Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. Applicant's May 17, 2006 Supplemental Appeal Brief has been reviewed. The previous rejection is withdrawn pursuant thereto. The Examiner regrets the lack of compact prosecution. However, the following action is deemed warranted.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1, 4-6, 8, 11, 15, 18, 21, 23, 25 and 26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, line 4, "persistent" is not clear.

Claim 1, lines 5 and 9, the "may be" language is not clear. Applicant appears to placing patentable weight on limitations that need not occur. Thus, the Examiner is confused as to the intended meets and bounds of the claim language.

Claim 8, lines 3 and 7, the "may be" language is not clear. Applicant appears to placing patentable weight on limitations that need not occur. Thus, the Examiner is confused as to the intended meets and bounds of the claim language.

Claim 15 is directed towards software language that constitutes first, second and third instructions. Applicant appears to placing patentable weight on pure software limitations. Thus, it is not clear.

Claim 21, line 1, "An Internet client" is not clear as to what constitutes such.

Claim 25, line 2, "the Internet" lacks antecedent basis.

Claim 26, lines 12-13, "amount for each transaction" is a run-on sentence and is not clear as to what constitutes such.

Claim Rejections - 35 USC § 101

4. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

5. Claims 1, 4-6, 8, 11 and 18 are rejected under 35 U.S.C. 101 because the claimed invention lacks patentable utility.

Claim 1 lacks a concrete useful or tangible result. As is, the transaction group need not be treated as a single transaction and as a plurality of individual transactions. The intended use claim language, i.e. "for" or "may be," does not provide any tangible result as these limitations need not occur.

Similar issues arise from claim 8.

Election/Restrictions

6. It is further noted that a restriction requirement may be required upon correction of the above noted matters. Nonetheless, if Applicant corrects the above issues and

proceeds with prosecution on the merits of the instant Application, the following is noted.

This application contains claims directed to the following patentably distinct species: Figs. 1, 2A, 2B, 3, 4A, 4B. The species are independent or distinct because each contains features not disclosed from the other Figures.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

7. A further reference of interest is noted. Purcell, US 5,727,161 appears to disclose Applicant's inventive concept.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew Joseph Rudy whose telephone number is 571-272-6789. The examiner can normally be reached on Monday thru Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Alexander G. Kalinowski can be reached on 571-272-6771. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
